Senior Frontend Engineer with 8+ years of experience building scalable, performant web applications using React, Next.js, TypeScript, and GraphQL, with additional experience in implementing back-end solutions. Proven ability to lead teams, implement clean architecture, and deliver impactful UX in a high-paced product environment.

Experience

National Australia Bank Gurugram, IN
Analyst - Engineer II Nov 2024 – Present

- Developed and optimized modular **React.js** components for NAB’s trading platform using a **micro-frontend architecture**, improving scalability and maintainability across teams.
- Collaborated with product owners and led frontend development efforts for high-performance, responsive, and testable React.js applications, significantly enhancing the trading user experience.
- Delivered a successful **Proof of Concept (PoC)** for integrating market and trade data into the platform’s micro-frontend ecosystem, enabling more robust and modular data-driven decision-making.
- Led frontend architecture and solution design for NAB’s Internet banking platform used by 10K+ users.
- Integrated **GraphQL** APIs with React.js components to streamline data fetching and reduce latency.
- Owned end-to-end delivery of **BPEM**, a critical workflow integration after large-scale data migration: authored the solution design, led the delivery team, and aligned multiple partner teams to meet **EU regulatory compliance** requirements, averting the risk of a financial penalty.
- Conducted **code reviews** and performance profiling, implemented accessibility practices, created an internal **accessibility tool**, and mentored junior developers on modern React patterns and architecture.

Newgen Software Technologies Noida, IN
Senior Software Engineer Jul 2018 – Nov 2024

- Led frontend implementation using React.js for NivaBupa’s insurance product suite, enabling a **120% increase** in policy issuance.
- Took charge of integrating the NivaBupa backend with third-party insurance provider apps such as Policy Bazaar. This involved capturing data through REST APIs, passing JSON objects, and seamlessly storing them in an SQL Server.
- Optimized application performance during the year-end process by implementing automation across various operational stages. Worked on identifying and resolving code issues that were affecting application performance, leading to a record-breaking volume of policy issuances during the year-end.
- Worked on the implementation of the Newgen product, leveraging React.js to streamline the banking process of *Bank Dhofar - Oman (client)*.

Skills

Languages: HTML/CSS, JavaScript, TypeScript, SQL
Technologies: React, Next.js, Redux, GraphQL, MongoDB, Node.js, Express.js, Tailwind, REST, Jest, RTL, CI/CD

Awards & Achievements

- AI Champion** - Chosen to lead AI adoption across squads and evangelize GenAI usage across NAB.
- Star Award** - Recognised for sustained excellence in product delivery.
- Spot Award** - Recognised for standout individual contribution.

Personal Projects

[Snaptix.ai](#): [NextJs, React, PostgreSQL, Next-Auth, TailwindCSS, OpenAI Api, Razorpay, FastAPI]
- AI-powered business analyst platform that turns spreadsheet uploads into dashboards, forecasts, and briefings.
- Dashboard/chart layer with TanStack Query and Recharts, integrated OpenAI-powered chat and Razorpay billing.

[Startup Analyst](#): [NextJs, React, PostgreSQL, Next-Auth, Gemin Integration, TailwindCSS]
- Built a production-grade application for VCs to analyse startups.
- Positioned Top 10 in Google GenAI Exchange Hackathon.

Education

Punjabi University (B.Tech. Computer Science) 2014 – 2018 Patiala, IN
